

**Town of Thompson's Station
Board of Mayor and Aldermen
Meeting Minutes
June 9, 2026, 6:00 p.m.**

Call to Order: The meeting of the Board of Mayor and Aldermen of the Town of Thompson's Station was called to order at 6:00 p.m. on June 9, 2026. Members and staff attending were Mayor Brian Stover, Vice Mayor Shaun Alexander, Aldermen Harry King, Kreis White, and Bob Whitmer, Town Administrator and Town Planner Micah Wood, Finance Director Steve Banks, Town Clerk Regina Fowler, Community Development Developer Micah Sullivan, Community Development Planner Susan Steffenhagan, Town Attorneys Andrew Mills and Kirk Vandivort. The Williamson County Deputy in Attendance was David Brewer.

Pledge of Allegiance:

Announcements: Administrator Wood announced the following. The State of the Town Address will be given by Mayor Stover. We had our first annual one last year. The date for that's been set for Thursday, July 23rd at 9 AM and we're hosting it this year. Obviously, the town hall renovations will have moved by that time to renovate the boardroom. Thompson Station Church is hosting the State of the Town Address, and we appreciate their offering the venue.

Williamson Inc. is helping us put that together like they did last year.

Superintendent Jason Golden will also be part of that discussion. So, mark your calendars, and we'll look forward to seeing you all and the rest of the community there on the 23rd.

Mayor Stover announced that News Channel 2 reached out to him a couple weeks ago about covering a story on our new greenway. He is unavailable so Micah Sullivan will be making his News Channel 2 debut tomorrow so, everybody tune in.

Public Comments:

Natasha McCoy - 1812 Casey Springs Road, Thompson Station. - And I'm here to address the e-bikes on the trails. I think a lot of us probably already feel the same way. But I have almost got hit by a bike that was going very fast. You don't even hear them coming. I've had a friend almost got hit. And I'm really concerned about the littles on the trails and the elderly people. I would ask that not only signs be put up, but there's also some kind of enforcement and fines. Because I've tried to talk to these kids, and a lot of them are very young and they don't really want to listen. So, we're just needing help in this area. I'm not the only one I have multiple, multiple people that have had similar situations, and I just don't want it to be a situation where someone goes to the hospital before something takes place.

Brad Smith, 1431 Channing. Drive Thompson Station. - So, my name's Brad, I'm a resident at Thompson Station. I've been on two wheels for four decades, guys. I also have a two-and-a-half-year-old son. I'm here in both capacities. I see both sides of this thing. You know, that said, I'd like to respectfully offer an observation and a proposal to complement what you guys have already done with the ordinance that's

being proposed. The one thing it does an excellent job of establishing where these vehicles may not go and how they must be ridden, but it doesn't address where they should go and how they will be ridden. I think we have an opportunity there. The reality is that most of these bikes we see on the greenway, are not being used for transportation. They're being used by children for fun, tricks, jumps, speed, and that really doesn't coincide with people using it from point A to point B, pedestrians walking, like I mentioned, the older couples as well. So, there's several states around the country that have adopted a method of building single track bike lines, just a 12 to 24-inch bike line off to the side of the paved path, jumps, small jumps, berms, a place that takes the kids off of our neighborhood streets and off of the shared paved path and gives them a designated place to do the fun, stupid stuff we know they're going to do on these things. I'd like to see maybe another time a proposal or something we can do to potentially take a look at doing that and really trying to take the focus off punishing the kids and giving them an opportunity to ride these bikes in a place designated to do it in that manner that doesn't take away from the overall experience of the greenway as a whole.

Consent Agenda:

- a. Approval of the Minutes of May 19, 2026, Regular Board Meeting.
- b. Approval Contract 2026-005 with Barge Design for a Professional Services Agreement for On-call Wastewater Engineering Services.
- c. Approval Contract 2026-006 with Barge Design for a Professional Services Agreement for On-call Geographic Information Services (GIS) Services.
- d. Approval for departmental purchases included in the FY2026-2027 Town Budget, effective 7-1-26.

Approve Consent Agenda:

Alderman White made a motion to approve the Consent Agenda. The motion was seconded by Alderman King.

Discussion – There was no discussion

The motion passed with the following vote:

5-Yay Votes: Alexander, King, Stover, White, Whitmer,

0-Nay Votes:

PUBLIC HEARINGS:

- **Ordinance 2026-014:** An Ordinance of the Town of Thompson's Station, TN Adopting the Annual Budget, and Tax Rate for the Fiscal Year beginning July 1, 2026, and ending June 30, 2027.
- **Ordinance 2026-012:** An Ordinance of the Town of Thompson's Station, TN to Approve Zoning for Property at 1655 Lewisburg Pike to Complete an Annexation Approved September 11, 2012.

Public Hearing Opened/Closed: Mayor Stover opened the public hearing for Ordinance 2026-014. After no response the public hearing was closed.

Public Hearing Opened/Closed: Mayor Stover opened the public hearing for Ordinance 2026-012. After no response the public hearing was closed.

Agenda Items:

1. **Consideration of 2nd Reading of Ordinance 2026–014: An Ordinance of the Town of Thompson’s Station, TN Adopting the Annual Budget, and Tax Rate for the Fiscal Year beginning July 1, 2026, and ending June 30, 2027.**
 - a. Staff Report
 - b. Ordinance 2026-014

Staff Report:

Micah Wood presented the staff report. This is the last procedural step in a more than six-month public process to establish the town's priorities through the town budget for the upcoming fiscal year. We've talked at length about this budget, but I'm proud of the work done by Steve and our department heads and the commitment of BOMA towards making this community even better through the execution of your priorities. Steve's got a high-level summary, and then we'll obviously be happy to answer any questions.

Finance Director Banks noted that this year's budget focuses on sustainable growth, long-term infrastructure, and increased commitment to public safety. Through our revenue diversification and stability, our revenues have increased over the past three years, by over 25%. Our strategic shift is moving away from development fee reliance towards more commercial revenue and expanded commercial tax base. Our long-term capital plan, focusing on transportation, includes the key projects, Thompson’s Station Road East, the Trailway Phase II, expecting both of those to move to bid later sometime this year. Our parks and facilities infrastructure for Sarah Benson Park, and renovations to Old Town Hall and public works structures.

Continuing with our wastewater infrastructure, looking forward to celebrating the new treatment plant later this summer, and expanding the sewer expansion capacity. We record public safety investment, historic funding for the first time, reaching up to a million dollars for public safety, expanded services, 100% increase for sheriff services, a new fire captain position, continued support for dispatch services, animal control and rescue squad station 23. Our operations and personnel with strategic staffing, adding critical roles in HR, codes, public works, and wastewater.

And improving our employee retention by including a 6.5% wage increase and 25% increase in our benefit allowance. We continue our efficiency in our operations by being a leader in our municipal expenses that are lower than the standards of the municipalities around us. And I want to say thanks to all the department heads, Brian King, Brandon Haskins, Micah Sullivan, Courtney LeChance, Regina Fowler, and to Micah Wood for pushing us and reeling us in at times, and to this board for stepping up and helping us throughout the year. Staff recommends approval.

Alderman King made a motion to amend the 2nd Reading of Ordinance 2026-014 to increase our property taxes and put the additional funds in a restricted account for the police department of the future. And the funds are not to be used for land or buildings, but personnel, vehicles, equipment, and the like. The rate is .013. The motion was seconded by Alderman White.

Discussion – Vice Chair Alexander - I've probably been the most active person behind this. I obviously support planning for public safety needs, and I support being honest about the cost of growth, but I do not support doubling the town's property tax rate. So, a 10-cent increase may sound small, but in Thompson Station, that's not a small policy decision. Our current tax rate, to your point, was just over 10 cents, 10.103, and some round numbers after that. Adding another 10 cents sounds small, but it's doubling our property tax rate. I think that deserves more than a broad statement that the money could be used for roads or maybe a future police force or other needs. I think if we're going to ask residents to pay more, we need a clear plan. What project is this funding? What's the timeline? What's the total cost? What other funding sources have been exhausted? What's the actual gap in funding? And so tonight, I don't believe that there's been a case for any of that. The last time you brought up roads, you said it's about public safety, but on roads, we've spent the last year moving in a different direction. We strengthened our transportation impact study requirements, so growth pays for more of its own way, and that was the point. Residents should not be asked to absorb the traffic impact of new development and then be asked to pay again through a higher property tax rate that the development caused.

On public safety, I agree that we need a plan, and we're working on a plan, but a future police department is a major operational decision. It requires a staffing plan, a service model, equipment, facility, transition plan, recurring cost model. I'm not willing to double the tax rate before any of that even exists.

I think we also need to recognize where the town is headed, so we've got major commercial growth that's coming, Sagefield and other large retail activity that should produce significant

sales tax revenue that can help fund town services. In my opinion, that's a better model. I would rather fund services through economic activity and visitor spending and what I call a consumption tax rather than place more burden on homeowners.

Property taxes hit every homeowner regardless of whether they cause the growth, whether they're new to the commercial areas or whether they can absorb another increase. Rising property values already increase the pressure on residents, especially those who are not in million-dollar neighborhoods. Some will say we have the lowest tax rate in the county, which you mentioned, and I see that as a strength, not a problem that we need to fix. Low taxes are part of responsible government when we are meeting our obligations, planning carefully, and using growth to fund growth. We should not raise property taxes simply because we can or because other cities have higher rates, in my opinion. I'm open to future conversations whether staff brings a defined need, a defined project list, a defined funding gap, or a clear expectation of why sales tax, grants, impact fees, developer improvements, EDIA tools, and other existing revenues are not enough. But tonight, I believe this increase is premature. It shifts too much burden onto existing residents before we have proven that we need to do that, and for those reasons, I will not support it.

Alderman Whitmer - We just went through an assessment of our property values, which resulted in an increase in our property taxes paid to Thompson Station, a significant increase, plus Williamson County did not fully adjust the rate down where it should have been to be tax neutral, so we had an additional property tax paid to Williamson County, and we need time for that to be absorbed and people adjust to that. I do want to say, I do envision a town at Thompson Station that has a commercial tax base that could allow us to keep our property taxes at the lowest in the county, and we can do that by watching our pennies and being good stewards of the money that we're trying to manage. I do see a need, I could, at some point, next year, year after, consider some raises to maybe staff public safety, a police department, but those would require long discussions that we will start in January of every year and have a robust discussion, understand how much we'd increase and for what purpose and why.

Alderman White - At this point in life, I can read a room well and I know where this is going. I do want to commend Alderman King for doing the hard thing, which is to propose something that is not popular, but doing so with a good goal in mind. It occurs to me that sales tax is a regressive tax. It taxes purchases. It doesn't tax passive income. Don't know that that's the most equitable way to run life, but it is the way that I perceive Thompson Station will run life for at least the next year. So, I will vote for his amendment and shake everybody's hand when it goes down.

Mayor Stover - We are accountable to voters at Thompson Station. And we did a survey that Micah Wood showed us at the work session. And I can't remember the exact way to define it, but it looked like of the overwhelmingly common response, I think 75% of the respondents, their main concern was the cost being passed back to the homeowners, the residents at Thompson Station.

And so, to Mr. White's point about reading a room, that's the main concern. So, we are still accountable to those people. And I would add that that's where the public engagement part goes out.

We have, if we ever had to do it, and I will be honest with you, I don't see us doing it anytime soon with what we have coming to us, but we would have to be able to come in and tell everyone, this is where the money's going to go. This is what we're setting it aside for, to be able to do this. And that doesn't happen on a first and second reading of a budget. It's a year long process. We must do our due diligence. We must tell the voters, this is what we are proposing. Again, no one likes bad news. Everyone hates being surprised by bad news. So, we must be able to communicate with everyone in a timely manner. And right now, in my opinion, it is not the time to do it. So, with that, we'll call the vote on the amendment.

The amended motion failed with the following vote:

2-Yay Votes: King, White,

3-Nay Votes: Alexander, Stover, Whitmer

Alderman King made a motion to approve 2nd Reading of Ordinance 2026–014: An Ordinance of the Town of Thompson’s Station, TN Adopting the Annual Budget, and Tax Rate for the Fiscal Year beginning July 1, 2026, and ending June 30, 2027. The motion was seconded by Alderman Whitmer.

The main motion passed with the following vote:

5-Yay Votes: Alexander, King, Stover, White, Whitmer,

0-Nay Votes:

2. Consideration of 2nd Reading of Ordinance 2026-012: An Ordinance of the Town of Thompson’s Station, TN to approve the Zoning for Property at 1655 Lewisburg Pike to complete an Annexation approved September 11, 2012.

- a. Staff Report
- b. Ordinance 2026-012
- c. Annexation & Election Results

Alderman King made a motion to approve 2nd Reading of Ordinance 2026-012: An Ordinance of the Town of Thompson's Station, TN to approve the Zoning for Property at 1655 Lewisburg Pike to complete an Annexation approved September 11, 2012. The motion was seconded by Alderman White.

Discussion – Attorney Mills noted back in 2012, the Board passed a resolution calling for annexation by referendum. It went to a referendum vote, and the Williamson County Election Commission certified the results. It has now been properly annexed into the town administratively. Again, the town never took the steps to have the state and the county recognize that, so this parcel is on the town's books as being in the municipality, and we need a zoning designation for this property. This is the second and final reading. The last thing I'll note, and I think we talked about this at the work session, was the Town's zoning maps going back through time showed this property as commercial, and the properties surrounding it are in the Town are also commercial. So that's the reason for the request in part, and staff recommends approval of this zoning ordinance.

The motion passed with the following vote:

5-Yay Votes: Alexander, King, Stover, White, Whitmer,

0-Nay Votes:

3. Consideration of 2nd Reading of Ordinance 2026-013: An Ordinance of the Town of Thompson's Station, TN to Approve an Update to the Town of Thompson's Station Community Development Department Fee Schedule.

- a. Staff Report
- b. Ordinance 2026-013
- c. Fee Justification

Approve:

Alderman King made a motion to approve Consideration of 2nd Reading of Ordinance 2026-013: An Ordinance of the Town of Thompson's Station, TN to Approve an Update to the Town of Thompson's Station Community Development Department Fee Schedule. The motion was seconded by Alderman White.

Staff Report – Micah Sullivan updated the Board regarding Ordinance 2026-013 is an update to the Community Development fee schedule as per requirements by the state. Each fee in excess of \$250 was assessed to ensure that we were basing that on a cost basis for each fee. There have been no changes since the first reading and work session. Staff recommends approval.

Discussion – There was no discussion.

The motion passed with the following vote:

5-Yay Votes: Alexander, King, Stover, White, Whitmer,

0-Nay Votes:

4. Consideration of 2nd Reading of Ordinance 2026-003: An Ordinance to Regulate Bicycle, E-Bike, and Utility Terrain Vehicle Uses on Town Greenways, Paths, and Trails.

a. Staff Report

b. Ordinance 2026-003

Alderman White made a motion to approve 2nd Reading of Ordinance 2026-003: An Ordinance to Regulate Bicycle, E-Bike, and Utility Terrain Vehicle Uses on Town Greenways, Paths, and Trails. The motion was seconded by Alderman King.

Staff Report: Michael Sullivan mentioned that this is the second reading of Ordinance 2026-003. Started back earlier this year to regulate e-bikes, bikes, and other vehicles on town paths, greenways, and trails. Since the first read and work session, we did have a couple of minor edits to grammatics, making sure those were up to date. Nothing of substance. So, with that, along with Park Advisory Board's recommendation, staff does make a positive recommendation to BOMA for the approval of Ordinance 2026-003.

Discussion –

Alderman King - Well, I don't agree with all the text. I'm with Alderman White. There's certain things, but I'd rather see something on the books now than something on the books later. So, you know, I'll support it. But my little caveat here is, as we always talk about, everything is enforcement. So, it all falls on staff right now. But if we had a police force earlier than later, they could take care of it. So that being said, anyone else wishing to speak?

Alderman Whitmer - This, you can argue this is not the most perfect ordinance, and we're seeing that behavior is, the e-bike industry is changing rapidly. Kids have embraced it. They love them. And we're having town-wide, city-wide, state-wide, nation-wide, we're having to deal with how do we handle e-bikes? This is our attempt, our first attempt, at trying to regulate e-bikes on the greenways. It may not be the most appropriate document. We talked about giving it a year, do nothing, see what the issues are, and then deal with it. But I think this is a better approach. We're putting some restrictions, wisely putting some restrictions right now. But I think we need to observe the issues we have on the greenways. And this is not a document that's set in stone. I see that in the next 12 months, we're coming back and tweaking it based on what we're seeing on the greenways, issues we're having, and the changes, the issues we're having with the kids and adults in the neighborhood on trails and roadways, too. But I believe this is good

for us. It'll suffice for right now, get some ordinance in our books, and the timing is great with the new greenway opening, and the kids love it. I am concerned about how we're going to enforce it. But again, I think that's one of the things we have to kind of talk about or look at for the next 12 months. How do we enforce it? Yes, a police department will help, but that's three years out.

Vice Chair Alexander - Yeah, I don't know that I can add a whole lot to that other than I know there's people here that are concerned about this. So just to address this, the enforcement is going to be a major issue because we're a town of 10,000 people, and this is our wonderful staff that has day jobs to do other than be on the trails and figure out who's breaking what rules. We appreciate everything you do, but I know that's a big ask of them.

We think that we're going to have to do a lot of work, I'd agree it's not perfect, but we think we've crafted, at least from my own experience and some others' experience, most of the issues we see are with the kids on things that look like dirt bikes. And we've already, outlawed those in this document. We've allowed like type one and type two e-bikes, which you rarely see any way.

You know, we talked about regular bikes that can go 60 miles an hour if you want them on the trails. We've set a speed limit; we've got a plan for putting up signage that helps educate. I mean, I think some of this is going to require parents. I mean, like we haven't allowed anything with wheels on our unpaved trails in Preservation Park, and every time I'm back there, the kids with the motorbikes are back there tearing up the trails. I'm an elected official, I can tell them, hey, you can't be out here, but then they're out there tomorrow. I don't know if we could outlaw everything, which at one point was an option. And I don't think that that's a great option because I don't want to punish people who are using it properly and using it for transportation. I've said many times, I have a teenager who uses a scooter and she goes and shops at Tollgate and does some economic activity over there and spends her money and it's great for that.

Mayor Stover - Yes, the big thing I'll say is I am the one who wanted to ban everything. But I think this is for the best, I think it's a good compromise. I have heard from other folks that are not here. They did, like the Vice Mayor said, his daughters on a scooter and goes over there and I understand it. I understand the type one, type two e-bikes, I get it. The biggest thing that we must do is come together as a community and self-parent and self-control what we're doing. We must educate everybody. I think one of the speakers talked about adding another side for the trails. When we started doing this grant, I don't think e-bikes were even a thing quite yet. I mean, we've been working on this for eight years.

I would love to see us have the funds eventually one day to create a park where people could go on their bikes and do that type of stuff. I'd love to do it. It's always been in the plans for the town. But to staff, if this passes tonight, when does the signage go up?

Administrator Wood - Probably early July. We'll have to get the signs created, put together. Kind of procedurally, we must, if you all approve this, Regina must publish it before it's effective. So, there's, you know, a few weeks where in the meantime, we will be working to get the signage ordered. We obviously must know what the rules are before we order the signs. So, you'll have to adopt it first. So, I mean, that would be something that would make it early next month.

I think it's very important for people on the Greenway to be able to point to the signs, like these are not allowed here. Those are very important. I think we want to put those up. We talk about putting the bollards up to keep the golf carts off there. That around July as well, sometime around there. Yes. I mean, as soon as the materials can be procured and Public Works has the capacity to be able to put them in. We have fines in that ordinance if they get caught multiple times. We're limited by the state on what we can fine, the maximum is \$50. That's by the state we're allowed to, that's it. So, we're kind of capped at what we can do on that.

Mayor Stover - I think again that we probably need to do a few social media videos, which everyone will love to do, kind of talking about the rules and everything and putting it out on our network. But we need to put it out on our community pages, kind of sharing that information, get our HOAs involved so we can share the information, what's allowed, what's not allowed. I don't want any injuries on that Greenway.

We worked too hard to get it done. I don't want anyone getting hurt on anything at all. Something is likely going to happen, which is unfortunate. As hard as we've worked and hard as we've talked about this, it's inevitable, it's going to happen. So, I would love to have a perfect world where we could make this right, but unfortunately, we're not in a perfect world. So, I would see we'd have to, we're going to pass this as it goes, but that's not to say we can't come back in and modify it as needed. But as far as signage goes as well, we're talking about the signs in Canterbury. They'll go up throughout the length of the Greenway.

Alderman Whitmer - Mayor Stover, regarding one of your points, we do have a new hire in our budget. We have a new hire for our Park's Coordinator, and I'd like to see us at some point put together a train education program for cyclists so we can roll that out community wide. And I'd

further like to see if maybe we can talk to the sheriff's department, see if they can put a rubber stamp on there to help us develop that program.

I think if we have the sheriff's department, the train program is sponsored or supported by the sheriff's department, it's going to get more response. I think that's going to go a long way to trying to minimize the risk and the dangers and liabilities on our trail. I'd like to, at some point in the next six months, talk about that with our new hire, talk about what we can do in that area.

Administrator Woods - Actually, we can kind of announce our new parks coordinator starts on the 22nd of this month. One of the first things that he'll be charged with doing is the public education and outreach related to the greenways.

Vice Chairman Alexander – This is going to require education and commitment from BOMA to share this information from us to the public. We need to get active on social media and share the rules. Communication is the key.

The motion passed with the following vote:

5-Yay Votes: Alexander, King, Stover, White, Whitmer,

0-Nay Votes:

5. Consideration of Responsive Bid for Sarah Benson Park Phase I Construction Project and Authorization for the Mayor to Sign said Contract with the Approved Responsive Bidder.

- a. Staff Report
- b. Responsive Bid

Approve:

Alderman White made a motion to approve Consideration of Responsive Bid for Sarah Benson Park Phase 1 Construction Project and Authorization for the Mayor to Sign said Contract with the Approved Responsive Bidder. The motion was seconded by Alderman King.

Vice Chairman Alexander amended the main motion to add Steelhead Building Group and Navholz Construction Corporation are non-responsive bidders for the reasons stated in the records to find FTM contracting to be the lowest responsive bidder to adopt the staff construction bid recommendation memo and lowest design recommendation as bonus findings, and as the town's statement under town code section 5-409, for an award not made to the lowest dollar bidder to award the Sarah Benson Park Playground contract to FTM contracting in the amount of \$2,050,000, including adding alternate number one and authorize the mayor to sign the final contract only after the town attorney reviews and

confirms that all contract documents are complete, corrected, internally consistent, grant compliant, and ready for execution. Alderman Whitmer seconded the amended motion.

Discussion –

Alderman Whitmer - Yeah, we're not required to take the lowest bid. We're required to take the best bid, and the Planning Commission and Parks Commission was unanimous that FTM was the best bid. We felt most comfortable, as did LOGE. So, they're responsive. They're providing more structures. We'll get a better-quality playground out of this whole deal.

One thing I did want to bring up is Brian has proposed a number of cost savings elements that if I total them all up, Brian said he can do all of them, it's going to save us about a million, almost \$600,000, 650,000. I'm doing the math here. By getting a shovel out there and looking at all these cost offsets that we can do. So, the price that we're looking at of \$2 million could come down substantially based on the work that Brian can do. I think that's worth considering because we did kind of go over our budget. But we feel good about FTM. They're responsive. What they're going to propose in terms of equipment structures was spot on what we needed. It was pretty much unanimous by the Parks Commission.

Administrator Wood added so, just as the purchasing agent, when we were compiling the information from the bid and looking at responsive bidders, the park master plan went through a public process. The parks board was involved in what that needed to look like and what the community expected. When we were looking at the responsive bids, we were looking at the plans that most faithfully executes that vision that was part of the public process.

So that's why, again, as Alderman Whitmer said, it's not the lowest bid that we got, but it was the most responsive. And with the deductions that Public Works is going to be able to do, we'll be able to cut the price significantly. Although we have budgeted for the entire amount in your budget that you've approved, we will work to save about \$650,000, so several hundred thousands of dollars' worth of savings to the project that we can also count towards our grant match. There is a double win for the town.

Attorney Mills clarified just for the record, so we're clear, it is lowest and best. That's the term of art. So, it's not always lowest, as Alderman Whitmer and Mike have said, but it is lowest and best. And they must be responsive. This is how we must think about it. If you go forward with these votes, you are awarding the lowest bid because they're the only responsive bid. You cut them out and they happen to come with the recommendation of the Parks Board staff and everything along with it. You're not awarding the highest bid; you're awarding the lowest bid because it's the one that's responsive.

Page 13

Alderman King reiterated, when I read through it, I like the idea that this company, is using better material and they're allowing the town to work with them to save us money. So, I'm personally happy with it.

Mayor Stover said, “We need to vote on the amendment first”.

The amended motion passed with the following vote:

3-Yay Votes: Alexander, Stover, Whitmer

1-Nay Votes: King

1-Abstain: White

The main amended motion passed with the following vote:

5-Yay Votes: Alexander, King, Stover, White, Whitmer,

0-Nay Votes:

6. Consideration of 1st Reading of Ordinance 2026-017: An Ordinance to Add Wastewater Title 18 Chapter 6 to Adopt a Fats, Oils, and Grease (FOG) Management Program to the Town Code.

- a. Staff Report
- b. Ordinance 2026-017
- b. FOG Management Program

Staff Report - Administrator Wood presented the staff report. He noted that the Utility Board unanimously recommended the above ordinance to BOMA for their consideration.

Approve:

Alderman White made a motion to approve 1st Reading of Ordinance 2026-017: An Ordinance to Add Wastewater Title 18 Chapter 6 to Adopt a Fats, Oils, and Grease (FOG) Management Program to the Town Code. The motion was seconded by Alderman King.

Discussion – There was no discussion

The motion passed with the following vote:

5-Yay Votes: Alexander, King, Stover, White, Whitmer,

0-Nay Votes:

7. Consideration of Request to Modify a Condition of Approval Related to the Use of Declaration Way as a Construction Entrance for the Planned Development Plan at 4445 Columbia Pike.

- a. Request for Reconsideration of Condition of Approval No. 6 – 4445 Columbia Pike
Planned Development Plan

Approve:

Alderman King made a motion to approve Consideration of Request to Modify a Condition of Approval Related to the Use of Declaration Way as a Construction Entrance for the Planned Development Plan at 4445 Columbia Pike. The motion was seconded by Alderman Whitmer.

Discussion – Alderman King wanted to make sure when school started that Declaration Way could no longer be used as a construction entrance.

Administrator Wood verified that the school has passed along an agreement and the agreement would end when the new school year starts.

The motion passed with the following vote:

5-Yay Votes: Alexander, King, Stover, White, Whitmer,

0-Nay Votes:

Adjourn:

There being no further business, the meeting was adjourned at 6:54 p.m.

Brian Stover, Mayor

Regina Fowler, Town Recorder/Clerk
